Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This in reference to response received 16 November 2006. Amendment to claim 1 and addition of new claims 12 – 15 is acknowledged. Claims 1 – 15 are pending for examination.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 11, drawn to an arrangement for facilitating the sharing of a content item, comprising a first user device, a facilitating device and a second user device, wherein the facilitating device is different from a content provider of the content item. The facilitating device comprising generating means for generating a representation for the content item (content from a different device), a retransmitting means for transmitting the representation to the second user device, an electronic payment receiving means for receiving an electronic payment from the first user device; wherein the representation for the content item is different from the content item, classified in class 705, subclass 1.
- II. Claims 12 – 15, drawn to drawn to a system for facilitating the sharing of a content item displayable on a first user device, the system comprising a content provider, the first user device, a facilitator and a second user

device wherein the facilitator comprises a receiving module to receive identifier associated with the content item and the identifier associated with the second user, a generating module, the generating module being operable to generate a representation of the content item (i.e. content is on the facilitating device), and a retransmitting module to transmit the representation to the second user device, wherein the representation of the content item is different from the content item, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I – II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as facilitating device is different from a content provider of the content item, an electronic payment receiving means for receiving an electronic payment.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone interview was not conducted due to complexity of the restriction requirement and since the examiner knows from past experience that an election will not be made by telephone. (see MPEP 812.01).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
